## Visitors

January 1, 2009 – June 30, 2014

ERI does not utilize the “visiting” title extensively. Short-term collaborators of various research groups are not tracked at the departmental level. In most instances, the visiting title is a mechanism to allow new researchers to begin submitting proposals while we seek external letters (e.g. Joan Florsheim, currently a PI on two grants with one other pending). As such, we are only listing below the individuals not identified as a PI (above) while their appointments were processed. Visiting appointments not identified as PIs are as follows:
